

Cypress Execution Report – WorkForcePro

Candidate: Puskar Adhikari

Date: June 28, 2026

1. Test Summary

Suite	Total	Tests	Passed	Failed	Skipped
Employee Management	2	2	0	0	0
Training Workflow	1	1	0	0	0
OJT Completion	1	1	0	0	0
Certification	1	1	0	0	0
Overall	5	5	0	0	0

2. Test Execution Details

Employee Management

Create Employee → Success message displayed.

Duplicate Email → Error message displayed correctly.

Training Workflow

Assign Training → Training record updated with “Assigned” status.

OJT Completion

Employee marks training complete → Status changed to “Pending Approval”.

Supervisor approves → Status changed to “Approved”.

Certification Tracking

Expiring certification alert displayed for expiry < 30 days.

3. Screenshots / Video (Optional)

Screenshots captured for each test run.

Video recording enabled in Cypress for full workflow validation.

4. Observations

All critical workflows passed successfully.

Duplicate email validation works as expected.

Alerts for expiring certifications are triggered correctly.

No flaky tests observed during execution.

5. Risks & Recommendations

Risk: If backend validation is weak, duplicate email may bypass UI checks.

Recommendation: Add API-level validation tests to strengthen coverage.

Risk: Certification expiry alerts depend on date calculations.

Recommendation: Add boundary tests (exactly 30 days, >30 days).

6. Conclusion

The Cypress automation suite validates the core workflows of WorkForcePro. All tests passed, demonstrating stability of employee management, training assignment, OJT completion, and certification tracking features.
